VOCABULARY ACTIVITIES related to **COMPUTER COMPONENTS**.

1. Matching Activity

Instructions: Match each word with its correct definition.

Expansion slot - RAM - Battery - CPU - Heat sink - Solid-state drive – Motherboard - Power supply - Hard drive - Video card

Definitions

A. The main circuit board that connects all computer parts
B. The device that stores data permanently
C. The part that processes information and carries out commands
D. The component that cools the processor
E. The temporary memory used while the computer is running
F. Provides electricity to all computer components
G. A space that allows additional cards to be added
H. Improves the display and graphics performance
I. A faster, more durable type of data storage
J. Allows laptops to work without being plugged in

2. Use the words in activity 1 to complete the blanks.

1. The _____ is the main board that holds and connects all parts of a computer.
2. The _____ processes all the information the computer receives.
3. To prevent overheating, the _____ removes excess heat from the processor.
4. The _____ provides short-term memory for running programs.
5. Files are stored permanently on the _____ or an _____.
6. The _____ unit sends power to all the internal parts.
7. A desktop computer may have an _____ for upgrades.
8. A _____ helps the computer produce better graphics.
9. A laptop can operate without power cables because of its _____.

3. Word Scramble: Unscramble the computer-related words.

1. PU (___)
2. RAHD VIDER (___)
3. MOTHREABODR (___)
4. MRAY (___)
5. TSAE DTLSE (___)
6. VEIDO DRAC (___)
7. TEBRTAY (___)
8. WROEP SLYUPP (___)
9. TNEAIXSN SLOTP (___)
10. HTAE SNIK (___)

4. Word Classification

Instructions: Put each word in the correct category.

Categories:
A. **Memory/Storage** B. **Power** C. **Processing**, D. **Cooling** E. **Expansion**

Words: CPU, RAM, hard drive, heat sink, motherboard, battery, power supply, video card, SSD, expansion slot
